

In my hometown K-Love is heard on FM station 91.1. K-Love is very important to my family and I as it is one of the very few positive, Christian stations available. It would be very disappointing to have the FCC arbitrarily pull the plug on a station that means so much to our community. K-Love is listener supported, so it is obvious to me that enough people in the Denver/Aurora area value its programming to personally make the commitment of funding it. Please do not take this station away from us!
